Nuclear Analytical Methods 1 - Mirror Hall (08:00 - 09:30)

time	[id] title	presenter
08:00	[181] Neutron and photon activation and ion beam techniques in geochemical characterization of moldavites and other impact glasses	MIZERA, Jiří
08:20	[318] Determination of silicon in beer and beer processing materials by fast neutron activation analysis. Is beer a possible protective factor in preventing Alzheimer's disease?	Dr KUČERA, Jan
08:40	[160] Prompt γ activation analysis as performed in Budapest	Dr RÉVAY, Zsolt
09:00	[173] Upgrade of the prompt- γ activation analysis (PGAA) and neutron induced prompt- γ spectroscopy (NIPS) facilities of the Budapest research reactor	Dr SZENTMIKLÓSI, László
