

Upgrade of the Quantum Hyperion Cluster

pátek 6. září 2024 10:10 (25 minut)

The Quantum Hyperion cluster currently runs CentOS 7 operating system, support of which have ended by June 30th, 2024. To continue running it safely an upgrade to a new system together with an overall upgrade of the software is needed. This talk is to summarize the changes that are currently being worked on and that will soon convert the Quantum Hyperion cluster into a new cluster called Quantum Hyperion 2.
