

# RadChem 2014

## Friday, May 16, 2014

### Nuclear Analytical Methods 5 - Mirror Hall (10:30 AM - 12:00 PM)

-Conveners: Nora Vajda; Vladimir Kolotov

time	[id] title	presenter
10:30	<del>A09</del> [A09] Development of three methods for determination of uranium isotopes in environmental samples by liquid-liquid extraction with tri-isooctylamine or solid-phase extraction by anion-exchange resin	Dr POPOV, Lyubomir
10:45	<del>A10</del> [A10] Accelerator mass spectrometry of uranium: titanium dioxide matrix and homogeneous precipitation	ŠPENDLÍKOVÁ, Irena
11:00	<del>A18</del> [A18] Laser Ablation of Actinide Oxides	CAMPBELL, Keri
11:15	<del>A14</del> [A14] Optimisation of a Liquid Scintillation counter for low-level measurement of Lead-210	Mr MEDLEY, Peter
11:30	<del>A13</del> [A13] Biogeochemical aspects of mineral content in yerba mate from Paraguay	Prof. FACETTI-MASULLI, Juan F.
11:45	<del>A11</del> [A11] Epithermal neutron activation analysis of forages from permanent grasslands of North-Eastern Romania	Dr CULICOV, Otilia Ana
