### Nuclear Analytical Methods 5 - Mirror Hall (10:30 AM - 12:00 PM)

-Conveners: Vladimir Kolotov; Nora Vajda

time	[id] title	presenter
10:30 AM	[95] Development of three methods for determination of uranium isotopes in environmental samples by liquid-liquid extraction with tri-isooctylamine or solid-phase extraction by anion-exchange resin	Dr POPOV, Lyubomir
10:45 AM	[391] Accelerator mass spectrometry of uranium: titanium dioxide matrix and homogeneous precipitation	ŠPENDLÍKOVÁ, Irena
11:00 AM	[238] Laser Ablation of Actinide Oxides	CAMPBELL, Keri
11:15 AM	[124] Optimisation of a Liquid Scintillation counter for low-level measurement of Lead-210	Mr MEDLEY, Peter
11:30 AM	[383] Biogeochemical aspects of mineral content in yerba mate from Paraguay	Prof. FACETTI-MASULLI, Juan F.
11:45 AM	[311] Epithermal neutron activation analysis of forages from permanent grasslands of North-Eastern Romania	Dr CULICOV, Otilia Ana
